Presentation of the Territorial Climate Plan (PCT) of the Bélier Region

Objective : Mobilize Technical and Financial Partners for PCT implementation

Date: 16/11/2022 Time : 17H- 18H30Place : UNDP Pavilion

Côte d'Ivoire, through the National Climate Change Program (PNCC) of the Ministry of Environment and Sustainable Development (MINEDD), receives financial support from the German Government (BMZ) and the European Union for the implementation of Determined Contributions at the National level or even at the sub-national level in Côte d'Ivoire.

So, the country has committed to a dynamic of decentralization of climate action for a better involvement of our local authorities.

Thus, the Bélier Region, a pilot territory identified at the end of a competitive process, has benefited from technical support from the United Nations Development Program (UNDP) to draw up its climate diagnosis and develop its Territorial Climate Plan (PC) with a local climate investment plan.

This dynamic of the decentralization of climate action requires a commitment from development partners in order to provide technical and financial support for the implementation of the projects of the territorial climate plan. A presentation of the PCT is therefore planned in order to mobilize a certain number of actors for its implementation.

Panel - Theme : Presentation of the Territorial Climate Plan of Bélier

YEBOUE-KOUAME Pascal,
President of Regional Council of Bélier

KOUADIO Georges,
Technical Adviser of the Minister of the Environment and Sustainable Development
